

L&R ONLINE AUCTIONS

VERSION 1.3.0 RELEASE NOTES

Released September 19, 2026

Version 1.3.0 improves bidding consistency, lot entry, administrator workflows, page addresses, and expired-session login. The release applies the same bidding rules throughout the platform and removes auction-level settings that are no longer needed.

Bidding improvements

The starting price remains the first bid. After the first bid, the required increase is based on the current bid:

Current bid	Next increase	Example
Below \$20.00	+\$2.50	\$2.50 becomes \$5.00
\$20.00 to \$49.99	+\$5.00	\$20.00 becomes \$25.00
\$50.00 or more	+\$10.00	\$50.00 becomes \$60.00

- These increments now apply consistently to standard bids, quick bids, bulk bids, and maximum/proxy bidding.

Lot entry improvements

- Added **Opened - New** and **Opened - Used** condition choices.
- Added **New**, **Opened - New**, and **Opened - Used** packaging choices.
- The new choices are available wherever they apply during lot entry.

Operations Hub

- Reserved payment and pickup information lots now use a compact administrative view.
- Complete customer-facing information remains available in the auction catalogue.
- Auction setup now applies the platform bidding rules automatically.

Login and page addresses

- Website pages now use clean addresses without **.php** in customer-facing links.
- Existing links remain compatible and continue to reach the correct page.
- Expired sessions can sign in again directly from the displayed login page.
- Administrators return to the intended page after signing in again.
